
Creamsource Lens Wide Angle

Outsight Creamsource Lens Wide Angle

Reference: CS-LENS-W

EAN13: -

60° Wide Angle Holographic Lens to fit Creamsource Doppio.

This lens can be dropped into the filter rail on the front of the fixture to increase the beam angle to 60°. Not to be confused with diffusion, this is a holographic lens which widens and softens the beam with over 90% efficiency.

Our high quality laser-etched lens material is mounted to a lightweight yet strong machined aluminium frame.
