

Creamsource Creamtwist Wired Remote

Outsight Creamsource Creamtwist Wired Remote

Reference: CS-REM

EAN13: -

If you're unable to reach the controls on your Creamsource, grab your Creamsource Remote for fast and precise adjustment of brightness and colour temperature. With two independent channels, the Remote can be used to control either one or many Creamsources when linked together by DMX cable. Crafted out of solid aluminium, with all metal buttons and optical encoder, it is as tough and reliable as the rest of the Creamsource range. 1/4 inch mounting thread and rubber feet on underside. Compatible with both Creamsource Doppio and Creamsource Mini fixtures.
