
Motorized Hoist

Motorized self climbing hoist for carrying light equipment

Reference: MMT1006

EAN13: -

The motorized self climbing hoist combined with appropriate accessories can be supported on specifically designed grid systems or directly mounted on the ceiling structure. This makes the unit extremely versatile allowing low cost solutions for medium and large size TV studios, film studios and stages.

Hoist's body is practically hoist itself. Aluminium !, intended for luminary carriages, is connected with its sides to electrical boxes, which contain cables and terminals for supply of lighting equipment. This construction is from its top side connected to a hoist's housing. Housing is made of aluminium box profile and steel sheet paneling. This housing can be divided into two units: unit for power drive with motor-gear monoblock and unit for electrical installation.

Caractéristiques :

Poids (kg): 150

Longueur (mm): 3000-5500

Extension (m): 6

Charge Maxi (kg): 150
