Stella Pro 5000 RF:

The Stella Pro 5000 RF delivers professional interview lighting that renders colors beautifully, sets up fast and travels anywhere. Perfect for mobile production crews and independent operators, it's compact design and integrated Li-Ion battery allow multiple Stella Pro RFs to be packed in carry-on sized bags eliminating worry and checked bag fees. With no cords to plug in or ballast warm-up periods, Stella Pro spLEDs are ready at a moment's notice and due to the lightweight design do not require heavy stands or counterweights. Featuring an extremely rugged waterproof construction, these powerful lights can operate in any location regardless of weather or power availability. RF wireless control further enhances the capability of the Stella Pro 5000 and gives shooters the ability to control the settings of one or multiple lights without moving from the camera or monitor.

Stella Pro 5000 RF Features:

- Integrated Li-ion battery: The Stella Pro 5000 RF can run completely cord free - and because the battery is integrated into the device - Stella is permissible in both checked and carry-on luggage.
- Multiple Power Options: For longer shoots simply plug Stella into any AC or DC power source including DTap Gold-mount/V-Lock battery "bricks" (DTap cable optional).
- 120-degree Beam Angle: Stella's light can be easily adjusted via a broad range of portable modifiers and light shaping tools including Profoto, Elinchrom, DOP Choice, and Chimera adaptability*.
- High Output COB "Chip on Board" LED: Eliminates the multi-shadow effect that can be a problem with panel-style light sources while also keeping Stella's footprint small.
- Experience true cordless freedom and control an infinite number of Stella RFs from a small remote (EL Remote Control) with a range up to 200 meters outdoors and 60 meters indoors with built in Elinchrom wireless communication receiver.

Stella Pro 5000 RF Specs:

- Certified TLCI 93+, CRI 92+, CCT 5600 Kelvin
- Output up to 5000 Lumens with 9,100 Lux at 1 Meter with Fresnel lens
- Rechargeable Li-ion battery maintains 1.5 - 6.25 hours of cord-free operation
- Sophisticated flicker-free firmware
- Regulated lumen output - does not fade during use
- Dimming with stepped or continuous smooth control
- Controlled focus from 120° to 50° & 25° spot via press-on modifiers
- OLED Digital Display offers precise readout of RF settings, output, battery and charge status.
- Runs off wall power or DTAP (11 - 25V)
- Fast Charge of 2 hours, 80% charged in 1.5 hrs - may vary depending on battery temperature

- Built in Elinchrom wireless communication receiver supports up to 20 frequency channels and 4 light groups
