

## 50° Focus Optic Lens, 82mm

Silicone 50° optic gives Stella an evenly dispersed beam with gentle light fall off. Excellent for concentrating light in a specific area and key lighting subjects. Silicone optic can be separated from retainer and used as a 3" speed ring holder for 3" Chimera softbox adapters or 3x3" hard gels. Compatible Lights: Stella 2000, Stella Pro 5000

Reference: 800-0285-A
