

Friction Mount Offset Adapter

Do you have a monitor with cable ports on the bottom and you can't connect your Friction Mount to it? The Offset Adapter was created just for that reason.

Reference: X-FMOA-10
EAN13: 859005002362

The XTENDER® (X-FMOA-10) Friction Mount Offset Adapter is made for those products that have cable connections directly underneath the unit (ie...older generation SmallHD monitors). It attaches to the Friction Mount Yoke and allows you to mount the product slightly in front of or just behind the mount.
