

High Torque Shoe Mount

With the larger diameter tightening ring on our High Torque Shoe Mount you can get all the leverage you need to tighten down your accessories.

Reference: X-HTSM-10

EAN13: 859005002683

The XTENDER® (X-HTSM-10) High Torque Shoe Mount has a new 1.5 inch diameter knob which allows you to get more leverage when tightening down. Like its predecessor the SHOE/MICROPHONE MOUNT (X-CSM-10) this product will allow you to connect XTENDER® Products to any shoe receiver. It will also allow you to screw on a 5/8" threaded mic clip so that you can either connect a microphone directly to your camera or, in combination with the Shoe Adapter (X-CSR-10) directly to an XTENDER® Arm. The (X-HTSM-10) can also convert the shoe mount on your camera to a 1/4-20" threaded mount.
