
ORION 4 – 1250W x 4 CYCLORAMA SOFTLIGHT

Available in rigid and single unit models
Single units may be interlocked to form multi-color systems

Reference: 26055

EAN13: -

The ORION groundrow Cyclorama lights are designed to evenly illuminate cycloramas and rely on the overlap of light from adjacent compartments. They are intended to be placed 1.2 m from the bottom of the cyclorama with a 1.2 m spacing between each compartment or colour circuit.

ORIONS can be used in conjunction with IRIS Cycloramas so as to cover higher cycloramas or to provide mixed colour washes.

ORION modular construction makes them a perfect solution for TV studios, motion picture sound stages and theatrical applications.
