

IRIS 4 - 1250W x 4 CYCLORAMA SOFTLIGHT

Single formed sheet steel housing assembled via electrical spot welding

Reference: 26140

EAN13: -

IRIS Cyclorama luminaires are designed to evenly illuminate cycloramas up to 7 meters high with maximum illumination at performer head height of 2 meters. The IRIS series is the ideal solution for the tallest cycloramas providing smooth even illumination.

The specifically designed lamp house compartment of the IRIS series - IRIS 1, IRIS 2 vertical & horizontal, IRIS 3 and IRIS 4 - have become a real industry standard.

IRIS 2 vertical and IRIS 4 come also in split versions, enabling the individual compartments to be positioned at different angles and thus allowing a more flexible beam spread when cycloramas are over 7 m in height.

Suitable for TV studios, motion picture sound stages and theatrical applications..
