

ARTURO 4 - 5000W/2500W STUDIO SOFTLIGHT

Lamp switching changes intensity without changing colour temperature

A range of three tungsten halogen studio softlights for 1250W, 2500W and 5000W operation

Accepts 189 mm linear tungsten halogen lamps at 1250W, 1000W or 625W

Suitable for studio and location

Optical system ensures shadowless indirect fill light from secondary reflector design

Reference: 26550

EAN13: -

Arturo 4 is a 5000W dual power softlights with four lamps, switched in pairs, to give intensity control with constant colour temperature. It provides virtually shadowless diffused illumination. The asymmetric beam distribution offers a constant and even illumination.

Designed for (4) 189 mm linear tungsten halogen lamps of 1250W, 1000W or 625W. A four-position rotary switch allows switching between one pair, two pairs, or off.

Optional eggcrate accessories may be fitted for directional control of the beam spread.
