On-board potentiometer to control the dimming level.

Reference: LD27252D
EAN13: -

The STUDIO LED X SERIES range combines the matchless features of the renowned QUARTZCOLOR Fresnel spotlights with the advantages of the LED technology innovation.

A high performing professional LED Fresnel spotlight range whose light output is equivalent to a traditional halogen source and permits a one-for-one replacement without compromises in the quality of the light: same brightness, same smoothness, same even and shadowless illumination as a traditional Fresnel spotlight.

Investing in LED fixtures brings immediate benefits in terms of savings: dramatically reduced power consumption, 50,000+ hours LED engine life vs 150 hours of a traditional halogen lamp, reduced AC requirements, no dimmers required, practically no maintenance and spare parts required thanks to the lack of heat.
