
Ultralight Flight Case

Ultralight Flight Case

Reference: 02-05-08-01

EAN13: -

The Ultralight Flight Case provides comprehensive protection, enabling the fixture to be easily and safely transported as cargo. The outer shell is made of strong and durable 1000 D CORDURA®. The shock absorption and stability is provided by Triplex reinforced cross-linked High Density Foam in a sandwich construction. Due to the light weight and compact dimensions, the fixture and common accessories can also be carried as hand luggage (please notice that the carriage of batteries in aircraft luggage is subject to additional regulations). The shoulder strap can be removed for cargo luggage and wrapped around the case to give extra protection, against accidental opening. The shoulder strap includes a white line to show, to allow it be easily set to the right wrap around length.
