
Manfrotto 190CCS

Colonne Courte P/190 Noir

Reference: 190CCS

EAN13: 8024221312553

Manfrotto

To improve the positioning flexibility of our tripods, a shorter centre column is now available as an accessory which can be ordered separately. If you need to work with legs set at the third angle of inclination (about 60 degrees) but still require the possibility of the camera up and down to achieve perfect adjustment for the shot, this shorter column replaces the one supplied with the tripod. For tripod series 3011/3021
