

Video HF 100m

XW-HDU05 system is designed for transmitting uncompressed 1080P HDMI, HD SDI/SDI video and audio from any camera to field monitors in 100m (LOS).

Reference: XW-HDU05

EAN13: -

XW-HDU05 system is designed for transmitting uncompressed 1080P HDMI, HD SDI/SDI video and audio from any camera to field monitors in 100m (LOS). It works on 5.1GHz~5.9GHz band radio frequencies and there are 0~9, total 10 frequency points for selection.

With high efficiency antennas, it transmits uncompressed video in 100m LOS with less than 1ms latency.

Caractéristiques :

Distance: 100m(LOS) uncompressed video transmission

Latence: less than 1ms

Entrées/Sorties: HD/SD SDI and HDMI
