

## Video HF 300m

XW-HDU04J system is designed for transmitting uncompressed 1080P HD SDI/SDI video and audio from any camera to field monitors in 300m (LOS).

Reference: XW-HDU04J

EAN13: -

XW-HDU04J system is designed for transmitting uncompressed 1080P HD SDI/SDI video and audio from any camera to field monitors in 300m (LOS). It works on 5.1GHz~5.9GHz band radio frequencies and there are 0~9, total 10 frequency points for selection.

With high efficiency antennas, it transmits uncompressed video in 300m LOS with less than 1ms latency.

### **Caractéristiques :**

Distance: 300m(LOS) uncompressed video transmission

Latence: less than 1ms

Entrées/Sorties: HD/SD SDI input & two SDI outputs available
