

Video HF 500m

XW-HDU06 system is designed for transmitting uncompressed 1080P HD SDI/SDI video and audio from any camera to field monitors in 500m (LOS).

Reference: XW-HDU06

EAN13: -

XW-HDU06 system is designed for transmitting uncompressed 1080P HD SDI/SDI video and audio from any camera to field monitors in 500m (LOS). It works on 5.1GHz~5.9GHz band radio frequencies and there are 0~9, total 10 frequency points for selection.

With high efficiency antennas, it transmits uncompressed video in 500m LOS with less than 1ms latency.

It supports full duplex intercom and wireless tally when works with accessory XW-TI.

Caractéristiques :

Compatibilité: Wireless intercom and tally signal return available

Distance: 500m(LOS) uncompressed video transmission

Latence: less than 1ms

Entrées/Sorties: HD/SD SDI input & two SDI outputs available
