

ROBIN BMFL WashBeam

Reference: ROBIN-BMFL-WashBeam
EAN13: -

The strong-arm of the BMFL family super powerful BMFL™ WashBeam comes with extra bright output and with a bundle of great features like full fledged framing shutters, super wide front lens or animation wheel. The BMFL™ WashBeam will excite any show by it's large beam produced through wide 180 mm front lens. With custom light source designed for Robe it produces a astounding 300 000 lux at 5 metres! Rotating gobo wheel with carefully selected gobos ensure many combinations of in air animations, but also nice spot-like projections on surfaces. Four fast shutter blades with smooth and precise movement offer individually angled positions within a frame - which itself can rotate through 90 degrees, providing a sharp or soft, precisely repeatable, frame for the projected image. Fast movement of the farming system also allows unique in air beam effects. Adding frost filter can enhance the projection by adding smooth touch on the beam's edge.
