
RoboSpot MotionCamera

Reference: RoboSpot-MotionCamera
EAN13: -

RoboSpot MotionCamera is a dedicated camera-based moving head with DMX remotely-controllable Pan, Tilt, Zoom and Auto-Focus. It features a special Full HD camera with high lighting sensitivity (min. illumination 0,3 Lux). The fixture provides a first-person-view for the follow-spot operator. Video signal of the internal camera is transferred in real time to the RoboSpot based unit via Ethernet (cat5 cable).
