
Robin Viva CMY

Reference: Robin-Viva-CMY
EAN13: -

Powerfully smooth, Robe's VIVA CMY combines the brightness of an exceptionally clear zero-fringing white beam together with the continuous color transitions of CMY mixing. Elegant and lightweight, packed with smart effects that are easy to use. The fixture is very powerful yet consumes little energy. The 270W white LED light engine gives an extra punchy beam and an incredible 20,000 hours of operation – in fact, no relamping will be needed for the entire life of the fixture! Smooth color transition and fixed vivid and radiant colours can be applied from a unique system of three colour wheels, with rotating or static gobos added for projections or mid-air effects. The smooth zoom can go out to 40 degrees at its widest and be softened it up with variable frost to create a gentle wash-like output or dynamic background projections. The minimum 8° zoom produces a piercing beam that can be trimmed with an ultra-fast stepless iris for a really punchy output. Viva also has extremely fast pan/tilt movement using Robe's proprietary EMS™ (Electronic Motion Stabiliser) technology.
