

## pixelPATT

Cables not included.

Reference: pixelPATT

EAN13: -

Continuing the retro style lighting design, the pixelPATT is a new addition to the PATT family. In spite of its eye catching retro design, pixelPATT is based on modern LED pixel controlled technology. The pixelPATT is composed of 7x 30W RGBW LED multi-chips, one in the centre surrounded by a ring of six, housed in a super-slim and lightweight brushed metal frame. Aesthetically it keeps the dimensions and attractive curvature of the PATT 2013 and the picklePATT, and this will also make it desirable for its physical appearance as well as for a light source. In order to make the pixelPATT elegant and a lightweight design, it has a remote Power and Data box PATT Driver, which is connected with the pixelPATT through an industry standard colour scroller cable with 4-pin XLR connectors (PATT Driver is supplied separately). The pixelPATT is an ideal fixture for television broadcasts, concerts, fashion shows or any type of event from awards to brand activations.
