

HALO RGB frame

Reference: 10071061

EAN13: -

ROBE

Halo – a new exciting dimension in led pixel lighting for stage and set. A circle of encapsulated bright micro-pixel led's, mounted on a standard size Parcan colour frame, Halo can bring the classic fixtures back into the latest lighting designs or be used alone to add many new dimensions and effects. Controlled via DMX, the operator can quickly and simply program the most sophisticated effects using the internal content generator or switch to display pixel mapped video content. The system consists of 6 frames of RGB led's and a 6 way data controller/driver in the familiar colour-scroller truss-hanging format. The system is interconnected using the industry standard 4pin XLR scroller cables that are already part of most lighting company inventories.
