

KELVIN Dome Diffuser - EPOS series

KV KEPOSDD

Principales caractéristiques

Kelvin Dome Diffuser pour Série EPOS. - Reference : KV KEPOSDD -

Mount anything to your Epos 300, umbrella style.

The Kelvin Epos Umbrella Mount allows for the mounting of photographic umbrellas and easy adjustment for focusing or defocusing the umbrellas. Umbrellas allow for either a soft light or a sharper more modelling light depending on the chosen size and material of the umbrella. This is best used in combination with the Kelvin Epos Dome Diffuser but will also work with the standard Diffusers.

Key features:

Allows mounting of photographic umbrella

Easy adjustment of photographic umbrellas

Works with most standard photographic umbrellas
