

KELVIN Honeycomb Grid 60 - PLAY series

KV KPLAYGRID60

Principales caractéristiques

Kelvin Honeycomb Grid 60 pour serie Kelvin Play. - Reference : KV KPLAYGRID60 -

Narrow the light beam, control spill and enhance depth.

Focused light allows for dispersing light in a directional beam and hardens shadows. In general, it adds drama and depth to your image.

The Kelvin Play Honeycomb Grid 60 narrows the light beam to 60 degrees, hardening the light to create a spotlight effect. Perfect when you want to give direction, prevent light spill or add shadows to your story.

Key features:

Focused directional light

60 degree light beam spread

Magnetic mounting
