

KELVIN Medium Diffuser 90D - EPOS series

KV KEPOSMDD90

Principales caractéristiques

Kelvin Medium Diffuser 90D pour Série EPOS. - Reference : KV KEPOSMDD90 -

Diffused light disperses light evenly across a subject and softens shadows. In general, it produces a more flattering image.

The Kelvin Epos Medium Diffuser D90 offers a slightly thicker diffusion, but with minimum light loss, less than 0.2 of a stop, and extends the beam angle slightly which makes it a better match for larger softboxes and also for less precise optics.

Key Features:

Medium diffusion for Epos

Widens beam angle

Allows for better color mixing with less precise optics

Magnetic mounting
