

MICRO RGBW kit PRO V-lock

CS KCSUCPROV

Principales caractéristiques

Kit Creamsource Micro Couleur RGBW kit Pro - V-Lock -. (Réf : CS K-CSU-C-PRO-V)

The Creamsource Micro Colour is Hollywood wrapped up in a neat little package. Elegant design, powerful, efficient and robust as can be.

IP65, RGBW with a CCT range of 2,200K to 15,000K, punchy and accurate producing vivid and saturated colours.

The Micro as been said to compete with 200W HMI fixtures. With a native 20° beam angle the Micro Colour has a long distance throw but can be softened and diffused for beauty shots too.

With 80W of power draw the Micro colour reads 12,340lux at 3.3ft. Thats a lot of bang for a fixture that can be running for over 1hour on a 95Wh V-mount battery.

Ce kit comprend :

- Projecteur Micro bender couleur
- Bloc d'alimentation Creamsource Micro

- Cable d'alimentation
- Plaque de fixation du bloc d'alimentation.
- Lyre
- Plaque de diffusion WIDE, MEDIUM et NARROW
- valise de transport
- module de fixation batterie monture V-lock
