

Nid d'abeilles Vortex4

CS CSV4HONEYCOMB

Principales caractéristiques

Nid d'abeilles pour Creamsource Vortex4. (Ref : CS CSV-4-HONEYCOMB)

The Vortex4 Honeycomb accessory is a light modifier designed to reduce the beam angle to 45°. This system works in conjunction with the Vortex4 Diffuser. The Diffuser takes the native 20° beam angle and softens it to a wider 60°. The Honeycomb then reduces and controls the angle of the softer beam.
